Getting Started

EpicCare Link is a tool that provides real-time web access to patient information so you can access patients' clinical data and communicate with United Regional to provide quality patient care. You can also use EpicCare Link to quickly refer patients to our organization.

EpicCare Link is a collection of different web pages, or activities, that correspond to different tasks. The activity that you use depends on what you want to accomplish.

This guide takes you on an introductory tour of EpicCare Link. The first pages include information to help you get started, such as browser requirements and how to log in. The rest of the guide contains explanations of how to use EpicCare Link.

Each organization configures Epic differently, so what you see in this guide might differ from what you see in your system.

Help and contact information

For help using an activity, click .

- If you forget your password or can't log in, call 940-764-HELP (4357).

Browser, system, and connection requirements

You must use one of the following Internet browsers to access EpicCare Link:

- Apple Safari 9 and any later versions
- Google Chrome 50 and any later versions
- Microsoft Internet Explorer 11
- Mozilla Firefox 45 and any later versions

On tablets, you must use iPad Safari or Android Chrome browsers.

EpicCare Link requires a minimum screen resolution of 1024x768 pixels. We recommend that you use a high-speed Internet connection to achieve the best system speed and performance.

How do I log in?

1. Open your web browser and go to <https://EpicCareLink.unitedregional.org>.
2. Enter the user ID and password that you received for EpicCare Link.
3. Select the "Remember Me" checkbox and enter your six-digit authentication code from the Epic Authenticator app or your email.
4. Select the appropriate department.

Navigating in EpicCare Link

When you log in to EpicCare Link, several sets of navigation tools appear at the top of the page.

A) Navigation Tabs: Use these tabs to open different activities in EpicCare Link. Each tab contains one or more related activities. For example, the **Patient** tab contains patient-specific activities. When you click a tab, the default activity for that tab opens.

B) Activity Menu: Use this menu to open the various activities that are contained in the selected navigation tab. For example, the **Patient** tab activity menu contains the **Allergies** and **Chart Review** activities.

- If there are more activities than can fit on the screen, hover over the ellipsis on the far right of the menu to see all the activities contained in the tab.
- You can also click  to pin an activity so it appears first in the menu. If you pin multiple activities, they appear in the order that you pinned them. Click and drag pinned activities in the menu to change their order.

C) Action Options: Use these buttons, located on the top right of the screen, to see all of your available activities or to log out.

How do I log out?

To maintain patient confidentiality, you need to log out or secure your screen when you are done working or have to leave the computer for any reason. There are two ways to do this:

- Click  **Log Out**. The next time you log in, you are directed to your start page.
- Secure the computer by going to **Menu > Secure**. When you log back in, you return to the same activity that you were using before you secured the screen.

Accessing the Patient Chart

Select your patient's chart from a list of current patients

1. Click the **SelectPatient** button at the center of the home screen and go to the **Search My Patients** tab.
 - If you have access to many patients, your patients might appear on more than one page. Use the field at the top of the page to search for patients by their name.
2. Click a patient's name to open his chart.
3. To view a list of currently admitted patients, select the **Patient List** navigation tab and select the tab for admitted patients. For patients to appear on this list, you must have a provider relationship of PCP, attending, admitting, or treatment team on the admission.
4. Select a patient's name to view additional patient-specific information in the report pane.
5. If you view a report frequently, click  to add a button for the report to the toolbar. From that page, you can also remove your report toolbar buttons, rearrange the order of buttons, and rename the reports.
6. Click  to open a patient's chart.

To see only the patients for whom you are the PCP, select your name in the **Filter by provider** field.

Search for a patient's record based on name or MRN

1. Click the **SelectPatient** button at the center of the home screen and enter the patient's name or MRN.
2. In the Search Results window, click the name of the patient whose chart you want to open.

In two clicks, you can quickly open a patient chart that you recently had open. In the **Search My Patients** section of the Patient Search activity, select the **Recent** tab and then click the name of the patient.

What if I can't find a patient?

If you don't find a patient using the methods above, you might not have been granted access to their chart yet, or they might not have a record in the system. Use the **Search All Patients** section of the Patient Search activity when you need to gain immediate access to a patient's chart for the first time, such as in the case of an emergency. Note that you must enter the patient's first and last name when using this method.

1. If your initial search returns no results, click **Search All Patients** from the Search Results window.
2. Complete all of the required fields, and then click  **Search**.
3. Select the patient record you want to open, select the reason you need access to the patient's chart in the **Reason** field, and add any comments. Enter any additional comments and click  **Accept**.

If the patient's record doesn't exist, you can create one in EpicCare Link by clicking **Create a New Chart** in the Patient Search activity.

Monitoring Your Patients

Event Monitor allows you to monitor events that occur in your patients' care, such as inpatient admissions or discharges, outpatient visits, or new lab results. You can view these events on the home screen or in your In Basket.

Target your event notifications

To focus on the medical events that matter most to you, use event and relationship filters in Event Monitor. You can tailor which types of events you're notified of and for which patients. For example, you can choose to be notified of only the events associated with you or certain providers in your group. You're associated with an event if you're the attending provider, admitting provider, referring provider, a treatment team member, a care team member, or the patient's PCP.

1. From the Home screen, click **Menu** in the top right corner and select **Settings** then **Event Settings**.
2. Choose which types of events you'll receive notifications for in the Event Filter section. To receive notifications for all the available event types, select the **Events I Will Receive** check box.
3. Choose which events you'll receive notifications for by selecting one of the options in the Relationship Filtering section:
 - a. **All events for patients in my group.** This option includes events for any patient that you have access to. For example, if you choose to receive referral notifications, you are notified of any authorized referrals, even if the referral isn't to you or your group.
 - b. **Only events associated with my group (recommended).** For example, if a patient you have access to is admitted to the hospital, and the patient's PCP is in your group, you receive a notification even if the PCP isn't associated with the admission.
 - c. **Only associations that I select.** This option includes only events associated with the providers or departments you select.
4. Choose who your notifications are sent to in the In Basket Settings section:
 - a. **Only me.** You are the only user who can mark the notifications as Done. Other users might still see and act on the same notifications, but they can't mark the message as Done. This option helps ensure that you see every notification.
 - b. **Any user in my group.** Your notifications are sent to a group of users at your organization, and any of the users can access the message and mark it as Done, which removes it from the In Baskets of all the users in the group. This option helps reduce the risk of duplicate follow-up and can save time.

View a patient's recent events

Select the **Home** tab and hover over each type of event in the **Unread Messages** section to review recent events for your patients.

If necessary, you can view more information about events and mark them as Done in In Basket by clicking the name of the patient in the Patient column.

For more information on In Basket, refer to p. 17.

Open a patient's chart from an event message

Select the In Basket message for the patient's event and click  **Select Patient** to open the patient's chart.

Reviewing the Patient Chart

Review the patient's chart before a visit

1. Open the patient's chart, click **Chart Review**, and select a tab that includes information you want to review.
2. To view more detail, such as a specific patient visit, click the date link that appears in the row.

To view details on several rows at once, select the check boxes in those rows, and then click **Start Review**.

3. To send a message to the patient's PCP regarding an office visit, click **Ask a Question**, fill out the message form, and click **Send Message**.

Find information quickly in the patient's chart

For patients with large charts, you can enter text in the **Search Chart** field to quickly find the information you need. For example, search for "cholesterol" to see a list of relevant matches in the patient's chart, such as lipid panel results and progress notes that mention cholesterol.

Use filters to narrow the list of information you see

You can also use filters to find visits, labs, medications, or other information in Chart Review. For example, on the **Encounters** tab, you can filter the list so you see only the visits associated with certain providers.

1. In Chart Review, select a tab.
2. Click **Filters** and select a filter type. Then, select check boxes next to the values that you want to see. For example, select Encounter Type, and then select the Billing Encounter filter.
3. Click **Apply** to make the results of your search appear.

To remove the search criteria and begin a new search, click **Clear All**.

View trending data in graph or table format in Chart Review

1. In Chart Review, select the check box for the data you want to view. For example, select specific visits or lab tests.
2. Select the type of flowsheet that you want to create.
 - Click **Encounter Flowsheets** to graph data such as vital signs or medications. Then select a specific flowsheet, such as Diabetes - Brief.
 - Click **Lab Flowsheets** to graph lab result data.
3. Click and drag to select the table cells that contain data that you want to graph.
4. Click **Line Graph** or **Bar Graph** to create a graph of the selected data.

View a patient's trending lab results in Results Review

1. Select the **Patient** tab and click **Results Review**.
2. Select the date range for the results data you want to see and click **Accept**.

3. To view a specific result component type, such as Hematology, or a specific result component, such as Hemoglobin, expand the tree on the left. Select the name of the component or component type that you want to view.
4. To view more columns of results, click **◀ Load More**. To view all columns of a patient's results for the time range that you selected, click **◀◀ Load All**.

Click **⌚ Time Mark** so the next time you view the patient's results, you can easily distinguish any new results from those that you have already seen.

Customize the way results appear

1. In Results Review, click **☰ Options**.
2. To make the most recent results appear from left to right by default, select the **Trend Dates in reverse chronological order** check box.
3. Set your other default preferences, such as the default number of columns to show, using the other options.
4. Click **✔ Accept**.

View a patient's allergies

Open the patient's chart, select **Snapshot**, and look at the **Allergies** section.

View a list of the patient's current medical problems

Select the **Patient** tab and click **Problem List**.

For more information about a problem, click the **View Report** link.

View a patient's current medications

Select the **Patient** tab and click **Medications**.

For more information about a medication, click **📄 View Details**.

View a patient's history

Select the **Patient** tab, click on the three dots towards the right of the screen, and select **Histories** to see a report with information about the patient's medical, surgical, family, and social history. Social history includes topics like tobacco use and sexual activity.

For a high-level summary of the current patient's chart, select **SnapShot** from the Clinical Review menu.

View a patient's demographics

Select the **Patient** tab, click on the three dots towards the right of the screen, and click **Demographics** to see a report with demographic information like the patient's address, PCP, emergency contacts, and more.

View a patient's billing information

To view information about the patient's eligibility for health plans, coverages, service areas, networks, and more, select the **Patient** tab, click on the three dots towards the right of the screen, and click **Billing Info**. You can expand and collapse the sections in the Services section and use the **Jump to** search bar to find specific services.

You can also see details about a particular coverage on the Benefits Summary page to:

- Determine whether a particular service is covered in or out of network.
- Determine whether a coverage is active.
- Determine whether benefits for a particular service are metered and what the limits are for each level of benefits.
- Determine what the patient portion will be for a particular service.
- Review a complete summary of benefits.

Uploading Files to the Patient Chart

Upload a file

You can attach a file to the patient's chart, such as an electronic copy of exam notes. The file is sent to an administrator at United Regional who verifies it before it's added to the chart

1. Drag and drop a file from your computer into the section below the patient's photo on the left side of the screen. Alternatively, click **Upload document** on the left side of the screen to open a window where you can drag and drop the file.
 - If you don't want to drag and drop a file from your computer, click **Add file** to browse for the file on your computer and select it.
 - Any files that you add must be smaller than the maximum allowed file size and be of an appropriate type.
 - The maximum allowed file size appears in a message below the **Add file** button.
 - To see which types of files you can add, hover over ⓘ.
2. Enter a description of the file.
3. If you want to remove a file that you selected, click ✕.
4. If the Message for reviewer section appears, enter a message for the administrator who review files.
5. Click **Submit for Review**

Placing Orders

You can schedule some orders directly from EpicCare Link. For more information on scheduling orders, refer to the section that begins on page p. 14.

Place a new order

1. Select the **Patient** tab, click on the three dots towards the right of the screen, and click **Order Entry**.
2. Select an ordering clinic and authorizing provider and click **Accept**.
3. Click **Preference List** to see a list of available orders.
4. Select the check box next to each order that you want to place. Use the subsections in the left pane to filter orders by type.
5. Click **Accept Orders** to review a list of your orders and make any necessary changes before signing them.
6. If there's a required () or recommended () icon next to an order, you can enter more information. Click an order's name to edit details like quantity or associated diagnoses.
 - For a procedure order, you can attach a file, such as a scanned image, to the order.
 - To associate a diagnosis with a single order, either select the check box for a recent diagnosis in the **Dx Association** section or enter a new diagnosis in the **Add a new diagnosis** field and press **Enter**.
7. Accept and sign the orders.
8. If there's decision support associated with any of the orders, select a follow-up action and click **Accept**.
9. Enter your password if prompted and click **Accept**.

If you already know the name of the order in EpicCare Link, you can search for it in the **New procedure** field.

Enter a partial word in a field instead of a whole word to reduce the amount of time you spend typing.

For example, entering "gluc" in the **New procedure** field in Order Entry shows you all of the procedures beginning with "gluc." You can use this shortcut for any information that is stored in the database, such as procedures and other providers' names.

Associating diagnoses for multiple orders

You can:

- Associate all of the patient's orders with all of the patient's diagnoses by clicking **Associate All** on the Diagnosis Associate page.
- Manually associate orders and diagnoses by selecting the appropriate check boxes.
- Select a problem from the Quick Picks list, which includes the patient's problems and recently-used diagnoses, and click the left arrow () icon to add the problem as a diagnosis for the encounter.
- Remove a diagnosis from the Diagnoses list by selecting the diagnosis and clicking the delete the selected diagnosis () icon.

Cancel a signed order

1. Select the **Patient** tab and click **Order Review**.
2. Select and cancel the order.
3. Enter a reason for canceling and click  **Accept**.

Scheduling Orders

Part I: Select the order to schedule

1. Select the **Patient** tab, click on the three dots towards the right of the screen, and click **Order Review**.
2. Select and schedule an order. Note that you can select multiple orders to schedule them simultaneously, such as if the patient is going to have a set of labs done on the same day.
3. If a questionnaire appears, answer the questions and click **Next**.

Part II: Search for and select an appointment time

1. On the Appointment Preferences page, search for an appointment date using the **Start date** and **End date** fields. Select the day/time check boxes to indicate the patient's availability.
2. Click **Next** and select the **Hold** check box for the time slot in which you want to schedule the appointment.
3. Click **Continue**. If prompted, enter the referring provider for this appointment in the **Referring provider** field.
4. Click  **Make Appointment**. You can print the report that appears as an appointment confirmation for the patient.

Cancel a Scheduled Order

You can cancel a scheduled order if necessary. For example, you might need to cancel a scheduled order after the patient is informed about the cost of a procedure.

1. Select the **Patient** tab and click **Order Review**.
2. Select an order and click  **Cancel Orders**.

Working with Referrals

Create a new referral

To create a referral, you might be required to enter information such as the referring and referred to providers, procedures to be performed, or diagnoses associated with the referral. You can also enter notes to communicate other information about the referral.

1. Select the **Patient** tab, click on the three dots towards the right of the screen, click **Order Entry**.
2. Click  **Preference List** to see a list of available orders.
3. Click **Referrals** and select the referral you want to order.
4. Click  **Accept Orders**.
5. In Order Entry, click the link for the referral to add information such as the associated diagnoses, attach any relevant files, and enter any comments. Click  **Accept** when you're finished.
6. Click  **Sign Orders**.
7. Enter your password if prompted and click  **Accept**.

View a list of referrals for a patient

1. Select the **Patient** tab and click **Referral by Member**.
2. The patient's active referrals appear, including any that are new, open, authorized, or pending review. To see all referrals, select **Show All Referrals** in the **View Option** field.
3. For more information about a referral, click the referral ID link to view a report.

You can't edit a referral that you've already created, but you can add additional notes or attachments to it and send a referral message.

View a list of referrals for specific providers or locations

1. Select the **Referral Search** tab.
2. Select either **Incoming** or **Outgoing** depending on whether you want to see referrals sent to your organization or referrals placed by your organization.
3. In the **Referred To** or **Referred By** section, select one or more providers or locations.
4. In the **Referral Status** section, select each referral status that you want to include in your search results.
5. If you selected **Outgoing** in step 2, select a scheduling status in the **Scheduling Status** section.
6. Enter dates in the **From** and **To** fields to limit your search to particular dates.
7. Click **Search**.
8. For more information about a referral, click the referral ID link to view a report. Click  to open the associated patient's chart.

Viewing Upcoming Appointments

The Upcoming Appointments reports sort appointments by patients in a particular patient group, if applicable, and then by date and time.

View upcoming appointments for your patients

1. Choose the upcoming appointments report you want:
 - a. To view a report for all of your patients, select the **Schedules** tab and click **Upcoming Appts - My Patients**.
 - b. To view a report for one patient, select the **Patient** tab and click **Upcoming Appts - Patient**.
2. Click the double arrow (⤴) icons to collapse or expand a section.

In Basket: Viewing Messages

In Basket is a quick and easy way to communicate with your colleagues. From here, you can view and sort messages, search for messages based on a number of criteria, and respond to your messages.

Select the **In Basket** tab to access your messages. Folders that group types of messages appear in the left pane. For example, you might see **CC'd Charts** or **Referral Authorization** folders. If you have new messages, the folder title appears in bold, and the number of new messages appears in parentheses next to the folder name. If you have a new high-priority message, the folder appears with a red arrow.

View a message

1. Select the folder for the type of message you want (for example, **Result Notifications**).
2. Select a message to read its contents.

Search for a message

1. Click  **Search**.
2. Enter as many search criteria as you want and click  **Search**. You can search by patient, message type, status, recipient, priority, date, or any combination of these.
3. To return to your normal In Basket view, click **My In Basket**.

Print multiple messages at once

If you are working with a paper system, you can print multiple In Basket messages to keep on file. Note that you can print multiple messages at once only for certain message types.

1. Select the folder containing the messages that you want to print and select the check boxes next to the messages that you want to print.
2. Click  **Print Selected**.
3. Select the right print settings and print the messages.

In Basket: Sending Messages

In Basket is a communication hub where you can send and receive secure messages similar to email. Messages are sent to individual recipients or to a number of recipients grouped in a class or a pool. You can also associate a patient with the message using the **Patient** field on the message form so that the recipient can refer to the patient's chart.

Send an In Basket message

1. Select the **In Basket** tab, click the arrow next to  **New Msg**, and select the type of message you want to send.
2. In the **To** field, completion match on the name of the person or group to whom you would like to send your message. To see a list of all possible recipients, click .
3. Enter a brief subject in the **Subject** or **Summary** field.
4. If you are sending a message regarding a patient, either click **Use <patient name>** to pull in the patient's name, or search for a different patient. This attaches the patient's name to the message.
5. Complete any other required fields.
6. Enter your message in the **Note** field.
7. When you are finished, click  **Send Message**.

Reply to or forward a message

Click a message to select it.

- To reply to a message, click  **Reply**.
- To forward a message, click  **Forward**.

Note: Reply and Forward options might not be available depending on the message you've received.

View messages you've sent

1. Select the **In Basket** tab and click **My Out Basket**.
2. Select a message type and then select a particular message to view it.
3. To return to your In Basket, click **My In Basket**.

In Basket: Responding to Service Requests

You might receive requests from United Regional to provide services for a patient. Accept or decline these requests to let United Regional know whether you can provide the requested service.

Respond to a service request

1. Open your **Service Requests** In Basket folder.
2. Review each message.
 - a. Click **Accept** or **Decline** depending on whether you can provide the requested service. If you decline, you're prompted to enter a reason for declining the request.
 - b. If you need more information before you make a decision, click **Reply** to send a message back to United Regional.

Using SmartTools

SmartTools are templates and shortcuts that can help you document faster.

SmartTool	Use to pull in
SmartTexts	Templates or blocks of text
SmartPhrases	Templates or blocks of text that you can create
SmartLinks	Information from another part of the chart
SmartLists	A predefined list of choices

You can use SmartTools in many places throughout the web application, such as In Basket messages.

If you see these buttons, the field is SmartTool-enabled:

Use SmartTexts

SmartTexts are standard templates or blocks of text used to write notes for routine visits or problems you treat often, such as diabetes.

1. Click  to see a list of available SmartTexts.
2. Double-click a SmartText to insert it.
3. Press **F2** or use the   icons to complete any SmartLists and wildcards (***) in the SmartText.
 - A wildcard (***) is a placeholder. You can type over it with your own text or delete the placeholder.

Use SmartPhrases and SmartLinks

Use a SmartPhrase

SmartPhrases allow you to type a few characters that automatically expand to a longer phrase, paragraph, or template. For example, typing ".me" enters your name.

1. In a SmartTool-enabled field, enter a period (.) followed by the SmartPhrase's name. For example, enter ".me". As you type, a list of matching SmartPhrases and SmartLinks appears.
2. Use the arrow keys to select the SmartPhrase you want to use and press Spacebar to insert it.
3. Press **F2** or use the   icons to complete any SmartLists and wildcards (***) in the SmartPhrase.
 - A wildcard (***) is a placeholder. You can type over it with your own text or delete the placeholder.

Use a SmartLink

SmartLinks help you write more quickly by pulling or "linking" information from the patient's chart directly into your documentation. SmartLinks often appear within SmartPhrases, but you can also use them on the fly. To pull one in, enter a period (.) followed by the SmartLink's name, as you do when using a SmartPhrase.

Browse available SmartPhrases and SmartLinks

1. Click  on the SmartTool toolbar.

2. Click any of the letters to see SmartPhrases and SmartLinks whose names start with that letter.

Use SmartLists

SmartLists are lists of common choices that help you quickly customize your documentation. For example, a symptoms SmartList might contain choices like wheezing and chest pain. SmartLists are used in SmartTexts and SmartPhrases and look something like this: {symptoms:406}.

1. Press **F2** to jump to the next SmartList or wildcard (***) in your note. Some values in a SmartList might be selected by default. You can change them if needed.
2. Click other values to select them.
 - A yellow background indicates that you can select only one value.
 - A blue background indicates that you can select one or more values.
3. If you accidentally select a value, click again to clear it.
4. To save your selections and move to the next SmartList or wildcard, right-click or press **Enter**.

Use the mnemonic "left-click to pick, right-click to stick" to remember which mouse button to use when you're making selections.

You can save time by documenting any abnormal values first and then applying any default values for the remaining SmartLists in one click. After selecting abnormal values, click  on the SmartTool toolbar to apply any available default values for the remaining SmartLists.

Viewing Crystal Reports

From the My Reports activity, you can view standard reports with relevant analytical data so you can track and follow up on trends, such as First Access usage.

Access your Crystal reports

1. Select the **Reporting** tab and click **My Reports**.
2. Click the report's link to view the most recent version of the report. To view a previous version of the report, expand the Previous Copies section and select the date of an available report you'd like to view.
3. If there are no recent copies of a report, you can request the report from United Regional.

Managing Your Clinic

Verify user records

You might receive a Site Verification message from your Epic organization asking you to verify that all users working at your site are current and active. From the message, you can click **Verify Now** and you are brought to the **Site Verification** tab in Manage My Clinic. From the **Site Verification** tab, you can verify that all the users working at your site are current and you can deactivate user records to prevent unauthorized access by users whose accounts are outdated.

1. In the Active? column on the **Site Verification** tab, select No for all the users whose accounts you want to deactivate. You can enter a comment in the **Comments** field that appears.
2. Select the **Acknowledgement** check box to acknowledge that you have reviewed and confirmed the list of users.
3. Click  **Verify** to verify the list of users and close the screen.

Deactivate a user

1. Select the **Admin** tab.
2. On the **My Groups** tab, select and deactivate the user using the red minus sign.

Request a new user in EpicCare Link

1. Select the **Admin** tab and click **Account Requests**.
2. Click **Request New Account**.
3. Choose the type of account you want to create. For example, to create an account for a new physician at your site, click **Request access for a new provider**.
4. Enter the user's demographic information.
5. In the **User group** field, select the user group to which the user should belong.
6. Enter a comment about your request, if necessary, and click  **Submit Request**.
7. After your request has been processed, the new user will receive a login instructions letter.

You can see the status of user requests that have been submitted in the Status column on the **Requests** tab.

Update facility contact information

1. Select the **Admin** tab and click **My Facilities**.
2. Click the name of a facility to update its contact information, including the phone number, fax number, and address.
3. After you've finished editing contact information, click  **Save**.

If an active address isn't on file, you can search for a matching address by entering an address and clicking **Find Address**. Alternatively, click **Manual Entry** to enter all of the address information yourself.

Updating Program Settings

You can use the EpicCare Link settings options to perform a variety of account maintenance tasks, including changing your password and setting the page that appears when you first log in. In addition, you can choose to receive email notifications at an external email address when you are granted access to a patient. You can set your preferences for these notifications, as well as specify the email address at which you'd like to receive them.

You can change settings for other tasks, like determining your default patient selection method. A description of each setting appears on the **Settings** page in EpicCare Link.

Change your password

1. Go to **Menu > Settings > Change Password**.
2. Enter your old password, then a new password, and then your new password again.
3. Click **✓ Accept**.

Set up your email preferences

1. Go to **Menu > Settings > My Demographics**.
2. In the User Information section, enter your email address, title, degree, languages, and specialties, if applicable. The fields that appear depend on your user role.
3. In the **Receive e-mail notifications** field, indicate whether you want to receive notifications for unread In Basket messages at your specified email address.
4. In the **Days between e-mails** field, enter the number of days you want to wait between notification emails.
5. In the **Receive notifications for group events** field:
 - Select **Yes** to receive email notifications about all patient events for the provider groups you belong to.
 - Select **No** to only receive email notifications about patients you specifically have access to.
6. Click **✓ Save**.

Change your default login page

1. Go to **Menu > Settings > Set Default Page**.
2. Go to the page that you want to set as your default page.
3. Click **Set Default Page** to set the current page as your default page.

To reset your default page to the system default, go to Set Default Page and click **Click here to clear your default page and use the system settings instead**.
