

EpicCare Link: Managing In Basket Notifications

Try It Out

1. From within the In-Basket activity, the left column will show you a variety of folders. Each folder will be a different kind of notification regarding a patient status, order, etc.

- 4. After reading a message, the total count of notifications will lower to reflect only the unread messages left in your In Basket. Use the toolbar above to take action on the message.
- To adjust what type of notifications you receive in your In Basket, navigate to the Menu > Settings > Event Notifications.
 - See tip sheet "Customization Event Notification Settings" for more detailed information.
